

# CpE-435 Computer Incident Response

[August 20, 2019]...rsn

Semester :                Fall 2019

*“We assumed the digital footprints we left behind  
– our clickstream exhaust, so to speak --  
were as ephemeral as a phone call, fleeting, passing, unrecorded.  
...Our tracks through the digital sand are [in fact] eternal.”*

T. Zeller, Jr., “Link by Link; Lest We Regret Our Digital Breadcrumbs.” The New York Times, 12 June 2006. [www.nytimes.com/2006/06/12/technology/12link.html](http://www.nytimes.com/2006/06/12/technology/12link.html)

Course Format

and Credit Hours :    3 hr Lecture, 3 hr Credit

Pre-requisites for Undergrads:      CpE-310/311 AND CS-350, OR Consent

i.e. Student should be knowledgeable in a high level language as well as assembly language, have computer architecture or computer organization background. Preferred to have CS-453, TCP/IP, as well but not required.

Co-requisites :            none

Instructor :                Dr. Roy S Nutter, Office: 257 AEB,  
Tel: 293-9131  
e-mail: [RNutter@wvu.edu](mailto:RNutter@wvu.edu)

PLEASE use **Subject: CpE-435** in all e-mail to me

Schedule :                 MWF 10-10:50

Location :                 211 ESB  
Labs will be in the West Virginia Cyber Crime Cooperative (WV3C) facility, Suite 3102 (Prete Bld), 3040 University Ave, Morgantown, WV

Office Hours :            By appointment (Although I am in my office a lot, best to call or e-mail me to be sure I will be there when you arrive.)

Course Objectives: This course is to serve as an overview course of Cyber Incident Response and Digital Forensics. Objectives include proper and legal investigation procedures, the legal basis thereof, and the technical basis for Cyber Defense. The student should be capable of good decision making with due regard for the legal process and procedures during and following investigation of computer incidents. When completed, the student shall be prepared to embark upon more detailed cyber defense and cyber incident response.

Expected Learning

Outcomes : Upon successful completion of this course:

The Student shall be able to

- a. Describe the basics of the justice system and how it relates to cyber defense, digital forensics, and digital evidence.
- b. Describe the basics of the legal system and the differences between the civil and criminal processes.
- c. Demonstrate a basic knowledge of the US Bill of Rights and of the US Constitution.
- d. Describe and recommend industrial/business computer policies
- e. Describe the rules and issues relating to the admissibility of evidence
- f. Identify the file systems usually associated with the most common digital media storage devices
- g. Describe the vulnerabilities that a computer system and/or network to which the organization may be exposed,
- h. Describe policies and associated controls to assist in safeguarding the organization,
- i. Describe how these devices contain evidence
- j. Describe principles of Cyber Response
- k. Setup and defend a Linux and a Windows system.

BOOK(s)

Highly Recommended:

“Cyber Operations, *Building, Defending, and Attacking Modern Computer Networks*”  
Second Edition, by Mike O’Leary, Apress  
ISBN-13: 978-1-4842-4293-3

Recommended (but not Required):

"Principles of Incident Response and Disaster Recovery"  
by Michael E. Whitman and Herpert J. Mattord  
ISBN = 1-4188-3663-X

“BTFM, Blue Team Field Manual”, Ver 1.2, by Alan White and Ben Clark  
ISBN: 978-1541016361

“Blue Team Handbook: Incident Response Edition”, by Don Murdoch, Ver 2.2  
ISBN: 978-1500734756

“Incident Response”. By Kevin Mandia & Chris Prosise,  
 Publisher Osbourne/McGraw-Hill, ISBN 0-07-213182-9  
 FIRST Edition ONLY

“RTFM, Red Team Field Manual”, by Ben Clark  
 ISBN: 978-1494295509

Grading: Semester grades will be computed as follows:

Assignments:	
Homework, Reading, and Research papers	30%
Attendance	15%
Portfolio	5%
Mid-Term Test	25%
Final Project	<u>25%</u>
	100 %

Grade Assignment : A= 90-100  
 B= 80-89  
 C= 70-79  
 D= 60-69  
 F= 59 and below

“e-Campus”:

We will use e-campus <https://ecampus.wvu.edu> for all assignments and communications. Be sure to run the “browser check” before you login and check your system for up to date software.

Grading Policy :

- Submit All Assignments **ONLY** on “e-Campus” on or before the date and time due.
- Some labs will discuss vulnerabilities in widely deployed computer systems. This is **NOT** an invitation to exploit those vulnerabilities. Responsible behavior and avoidance of all unethical behavior is expected. WVU’s policy (and our own) on this is clear: you may not break into machines that are not your own. In addition to an unforgivable F will be given in the course and WVU proceedings under the Student Code of Conduct, legal proceedings and legal penalties may be brought against you for such actions.
- Homework joint work: Students are encouraged to discuss homework assignments but **must submit their own individually prepared assignments**. Jointly prepared and/or copied assignments **WILL** be severely penalized.
- Reading and Research joint work is prohibited. No discussion with anyone until after work is turned in. Jointly prepared and/or copied assignments **WILL** be severely penalized
- Other notes on academic dishonesty
  - I consider it academic dishonesty if you share final assignments, work, solutions, etc with other students.
  - Changing variable names and/or output messages does not make it original work!
  - If **ANYTHING**, including code that is “reused,” you must cite the source (code

source can be cited in the comments for that code or routine. This includes your own previous work!)

- Allowing others to view your work by leaving permissions set incorrectly or leaving files on hard drives or other disks accessible by others will be considered academic dishonesty and will result in an F in the course.
- If a student does discuss and share work with another, thinking that the person who is receiving that information will not copy it, both people will be held responsible for academic dishonesty if identical work is submitted and both claim that it is original.
- Grades assigned during the semester on exams, quizzes, reports, or homework assignments are considered final and are not subject to negotiation for any reason other than an indisputable mistake in grading.
- Use of cell phones, smart wearable devices such as Apple watches etc, or possession of other external communication devices are strictly prohibited during exams, tests, or quizzes administered inside the classroom.
- Common standards of academic integrity prohibit not only cheating or plagiarizing, but also the unethical conduct of trying to obtain grades that the student has not earned. Violations of academic integrity are described in the WVU Catalog: <http://bit.ly/2hDAeUa>.
- Students have the right to appeal final grades. The appeal process is outlined in the WVU Catalog: <http://bit.ly/2uiMM9E>.
- Incidents of student misconduct or academic dishonesty will be handled promptly and appropriately in accordance with the WVU Student Conduct Code and Discipline Procedure. The case will be referred to the Office of Student Conduct. Violations may lead to dismissal from the Statler College and expulsion from the University.

Makeup Exams: No make-up exams (except by prior arrangement with the instructor.)

**NOTICE: All course materials, including lectures, class notes, quizzes, exams, handouts, presentations, and other materials provided to students for this course are protected intellectual property. As such, the unauthorized purchase or sale of these materials may result in disciplinary sanctions under the Campus Student Code.** (<https://studentconduct.wvu.edu/policies-and-procedures>) [adopted 5-11-2015]

Assignments:

1. Assignments will be made via e-campus.
2. It may consist of reports, class presentations, assignments, and laboratory investigations.
3. We may be using the WV3C lab at 3102 Prete Bld several times during the semester. You may be REQUIRED to do your work there.
4. ALL ASSIGNMENTS will be submitted on e-campus. No paper copies or e-mail submissions will be accepted.
5. Each assignment will be worth approximately the same amount of credit unless otherwise noted.
6. Assignments are due at the time and date assigned.

7. No late HW or other assignments will be accepted.
8. Assignments and final project at the end of the semester may also require the use of computers and equipment that are located in 3102 Prete (USC.)
9. You must plan on using time **ONLY WHEN WE ARE SCHEDULED** in the lab complete these assignments (investigations.)

Class Communications:

All class communications will be via [ecampus.wvu.edu](http://ecampus.wvu.edu)  
Lecture notes and assignments will be posted here as well.

Class reading and research assignments:

1. The results of these assignments will be submitted on e-campus before time and date due.
2. These will require you to read on line and to find outside references.
3. The results will typically require a summary of the reading material in approximately 600 words or about two pages or less.
4. Diagrams may be used as part of the page to illustrate your summary.
5. You may also choose to use instead, 10 to 15 PowerPoint slides instead.
6. Your final submission for each of these assignments should look professional and have good English form.

Attendance Policy: This class will be impossible to pass without attending class.

WVU Inclusivity Statement:

"The West Virginia University community is committed to creating and fostering a positive learning and working environment based on open communication, mutual respect, and inclusion. If you are a person with a disability and anticipate needing any type of accommodation in order to participate in this class, please advise me and make appropriate arrangements with Accessibility Services (293-6700). For more information on West Virginia University's Diversity, Equity, and Inclusion initiatives, please see <http://diversity.wvu.edu>."

Class Cancellations: If a class is cancelled, notice will be posted on e-campus and mailed to your MIX ACCOUNT. Generally, assignments will be posted as well to replace the missed lecture time. Students are responsible for getting cancellation information and assignments. In all emergency situations, however, we rely on individuals to make the best decision for themselves about their safety.

Class distractions: Cell phones, must be turned OFF during class. These are distracting for all.

Laptops and pads in Class: You may use your laptop in class provided that you are using it to take notes or to view e-campus pages for class notes.

E-mail, IM, general surfing and game playing are forbidden during class !!

## General Course Schedule

<u>TOPICS</u>	<u>Approx. # of lectures</u>
1) Overview of the Law and Ethics <ul style="list-style-type: none"> <li>a) Preparation for Computer Investigation</li> <li>b) The Legal Process, justice system and how it relates to digital forensics and digital evidence.               <ul style="list-style-type: none"> <li>i) basics of the legal system and the differences between the civil and criminal processes</li> <li>ii) discuss ethical (as well as legal issues) such as software piracy, reverse engineering, import/export rules, music sharing, etc and its impacts on a company's financial bottom line,</li> <li>iii) discuss Intellectual property, patents, copyright, piracy, reverse engineering, import/export rules</li> </ul> </li> <li>c) CF Definitions</li> <li>d) basic knowledge of the Bill of Rights and constitutional law               <ul style="list-style-type: none"> <li>i) how it applies to computer and network search and seizure,</li> <li>ii) discuss the 4<sup>th</sup> Amendment to the US Constitution and</li> </ul> </li> <li>e) statutes such as the ECPA and the legal requirements for obtaining electronic information               <ul style="list-style-type: none"> <li>i) Computer Fraud and Abuse Act (1986) and amendment</li> <li>ii) West Virginia state guidelines</li> <li>iii) US federal guidelines, and International guidelines</li> <li>iv) Industrial computer and network policies</li> </ul> </li> <li>f) USA Patriot Act of 2001</li> <li>g) the rules and issues relating to the admissibility of evidence, both constitutional and statutory, to include search and seizure, chain of custody, and suppression; highlight the differences between civil and criminal situations and employer/employee issues               <ul style="list-style-type: none"> <li>i) apply the rules of evidence as they relate to an electronic crime scene and to obtaining computer evidence. (i.e. recognize what can and can NOT be seized at an electronic crime scene.)</li> <li>ii) and discuss the methods of ensuring the chain of custody of evidence.</li> </ul> </li> </ul>	[4 weeks]
2) Recognizing the signs of an incident <ul style="list-style-type: none"> <li>a) Non-liturgical forensics exam</li> <li>b) Investigating Windows 2000</li> <li>c) Investigating Windows XP</li> <li>d) Password Access</li> </ul>	[1 week]
3) System Vulnerabilities : <ul style="list-style-type: none"> <li>a) Understanding TCP/IP               <ul style="list-style-type: none"> <li>i) Protocols</li> <li>ii) OSI std</li> <li>iii) TCP/IP addressing</li> <li>iv) The IP header</li> <li>v) IP fragmentation</li> <li>vi) Routers, switches, hubs, intrusion detection systems</li> </ul> </li> </ul>	[1 week]

- vii) E-mail, instant messaging
  - viii) etc
  - b) WINDOWS systems and network vulnerabilities [1 week]
  - c) Policies and Controls for safeguarding the organization [1 week]
    - i) Policies
    - ii) Login banners
    - iii) Logging
  - d) Investigating a live system with multiple users! [2 weeks]
- 2) Data Forensics Definitions and Procedures [4 weeks]
- a) file systems and data storage NTFS vs. FAT32
    - how these devices contain evidence
  - b) varieties of data storage devices and how they operate
  - c) how these devices contain evidence
  - d) capture of critical system information from Windows 9X
  - e) Sources of information for stand-alone machine investigation.
    - (a) Temp files, history files, trash bins,
    - (b) Slack and Swap Areas
  - f) contextual knowledge of the crime
- 4) Linux Systems [1 week]
- a) File Formats
  - b) Multi-user system
- 5) Possible Guest lectures by NW3C or others
- a) Cell phones and Towers
  - b) Basic Files systems i.e. FAT
  - c) E-mail and file formats
  - d) IExplorer and Firefox artifacts

**Other Policies:**

1. *From time to time, we may discuss with student participation, interesting papers, cases, tools, and vulnerabilities in widely deployed computer systems. This is not intended as an invitation to exploit those vulnerabilities. It is important that we be able to discuss real-world experience candidly; students are expected to behave responsibly. The tools and systems used in this class are exclusively meant for student experimentation and project work connected with the class. They are not to be used outside of that environment, and certainly not to impede or disturb the work of others. Responsible behavior and avoidance of all unethical behavior is expected. WVU's policy (and our policy) on this is clear: you may not break into machines that are not your own; you may not attempt to attack or subvert any system security. Breaking into other people's systems is inappropriate as well as illegal! The existence of a security hole is no excuse. A Grade of F and dismissal from the class at a minimum is automatic for such behavior. WVU penalties will then be assessed as well. In addition, there may be criminal proceedings that can be brought against you for such actions. Unauthorized access, use, modification, destruction, or disclosure of any computer system or computer network or any computer software, program, documentation, or data contained in such computer system or computer network is computer crime and will be prosecuted as such.*

*It should not be necessary to say that you ARE expected to abide by all WVU Policies at a minimum.*

2. *If you expect to work in this field in the future, for many branches of government as well as many companies, you will be expected to be capable of passing a background check. Many government and private companies may require a security clearance as well.*

3. *Drug Policy: See next page-*

---

## CpE-435: Cyber Incident Response

### Portfolio Guidelines

last update 11/2018 by rsn

Portfolios are used as an assessment tool and a learning tool for the student. The learning objectives for the course are specific and are enumerated in the course syllabus. The portfolio then serves to document your progress toward the learning objectives of this course. You will turn in your portfolio at the scheduled final exam time. It is best if you collect your material as the semester progresses.

## THE PORTFOLIO

It is important to include all of the following:

1. **Title page:** Should include name and class.
2. **Cover Letter** “About the author” and “What my portfolio shows about my progress in this class (written at the end of the semester, but put at the beginning of the portfolio). The cover letter summarizes the evidence of a student’s learning and progress.
3. **Self-Evaluation:** Your overall class self-evaluation, written at the end of the semester. You should include in this, a well-supported argument for the course grade you think you deserve.
4. **Table of Contents with**
  - Numbered pages.
  - Index tabs.
5. **Entries –**  
Required
  - Using the learning objectives in the syllabus as an organizational guide, you should provide a complete and well organized record of the class.
  - This material should be organized as a summary of the class so that you can use it in the future as a reference since you may now be the expert at your new company.
  - Appendix: Your Incident Response Toolkit
    1. This will simply be a list of the software in your ‘Incident Response Toolkit.’ This can be tools you used on the NCL or that were talked about in class or that you used on your final project. This should consist of:
      - Name of Tool      Use of tool      hyperlink to obtain the tool

### Optional Appendixes:

These items allow the folder to represent the uniqueness of each student.

- You may choose to include “best work” or your “favorite pieces of work.”
- You may include also a piece of work which gave trouble or one that was less successful along with give reasons why it wasn’t successful.
- **Reflections** can appear at different stages in the learning
  1. For each item - a brief rationale for choosing the item should be included. This can relate to students’ performance, to their feelings regarding their progress and/or themselves as learners. Students can choose to reflect upon some or all of the following:
    2. What did you learn from it?
    3. What did you do well?
    4. Why did you choose this item?
    5. What do you want to improve in the item?
    6. What were the problem areas?
    7. How did I perform on this?

**REMEMBER: Do NOT put extra items into the portfolio just for volume. It is quality that counts, not quantity, and the main point of portfolio assessment is the thoughtful selection of evidence of learning.**
